WHEEL DRIVE**26 min**DC CHARGE, 30 TO
80 PERCENT

The eπ007 REEV is the range-extender version of the eπ007 electric sedan we already sell. It always drives on electric power, and a small 1.5 litre petrol engine works only as a generator, charging the battery when it runs low. That means 180 km on battery for the daily run and 984 km in total (WLTP), with a quick fuel stop instead of a wait at a charger.

01

Electric driving, petrol backup

180 km on battery alone and 984 km in total (WLTP). The petrol engine never drives the wheels; it only makes electricity.

02

Strong rear-drive motor

A 160 kW (215 hp), 310 Nm electric motor drives the rear wheels.

03

Slippery shape

A drag coefficient of 0.206 helps both the battery and the fuel tank go further.

04

Cinema-style cabin

A 15.6-inch HD centre screen and a 19-speaker WANOS Premium sound system.

05

Charge fast, power out

DC charging from 30 to 80 percent in 26 minutes, and a 220 V outlet to run tools or appliances from the car.

06

Full driver assistance

Automatic emergency braking, adaptive cruise, lane keeping, blind-spot monitoring and a 540-degree camera.

DONGFENG EP007 REEV · SPECIFICATIONS

BODY	Five-seat mid-size fastback sedan
POWERTRAIN	Range extender: rear electric motor, 1.5 litre petrol generator
POWER AND TORQUE	160 kW (215 hp), 310 Nm, rear-wheel drive
