

DONGFENG · MID-SIZE SUV · HYBRID OR PLUG-IN HYBRID

HUGE HYBRID

The Huge you know, now with hybrid economy and electric driving.

5.8 L/100 km

FUEL USE, HYBRID
(WLTC)

185 km

ELECTRIC RANGE,
PLUG-IN HYBRID
(CLTC)

1,412 km

TOTAL RANGE, PLUG-
IN HYBRID (CLTC)

180 kW

COMBINED POWER,
HYBRID

The Huge Hybrid is the hybrid version of the petrol Huge we already sell. The Hybrid keeps the familiar Huge body and adds a self-charging electric drive for 5.8 L/100 km (WLTC), with no plug needed. The Plug-in hybrid has its own styling and a 42 mm longer body, charges at home and covers up to 185 km on electricity alone (CLTC), enough for most daily driving without petrol.

01

Two ways to use less fuel

The Hybrid charges itself as you drive and never needs a plug. The Plug-in hybrid charges at home and runs up to 185 km on electricity alone (CLTC).

02

Big power, low fuel use

The Hybrid pairs a 1.5 litre turbo with a dedicated hybrid drive for 241 hp and 540 Nm, and uses just 5.8 L/100 km (WLTC).

03

Long range between fill-ups

With a full tank and a full battery, the Plug-in hybrid covers up to 1,412 km (CLTC), so long trips need little planning.

04

540-degree camera

The Hybrid's 540-degree panoramic camera adds narrow-lane views front and rear, a real help on tight roads and in busy car parks.

05

Light-filled cabin

The Hybrid has a 1.17 square metre Sky Mirror panoramic sunroof, Jamo audio with 10 speakers and a powered tailgate with memory.

06

Rear-seat comfort

The Plug-in hybrid adds a multi-function rear armrest, fold-out tables and a refrigerated storage bin for passengers in the back.

DONGFENG HUGE HYBRID · SPECIFICATIONS

Comes as: Hybrid · Plug-in hybrid

BODY	Five-seat mid-size SUV
