The ZNA Rich 6 EV is the electric version of the Rich 6, the pickup in our line-up as the ZNA Rich 6 Pro. It keeps the five-seat double cab and the 1,510 mm load bed, and swaps the engine for a 120 kW, 420 Nm rear motor whose reduction gear is built into the rear axle. With the lithium iron phosphate battery it covers up to 400 km on the NEDC cycle.

01

Strong electric drive

120 kW and 420 Nm from a rear motor, with the reduction gear built into the rear axle.

02

350 to 400 km

Up to 400 km (NEDC) with the lithium iron phosphate battery, or 350 km (NEDC) with the ternary lithium version.

03

CATL battery

Both versions use a CATL battery pack with its own heating device.

04

Full safety kit

Disc brakes all round, tyre pressure monitoring, a rear camera and parking sensors, with stability control on the ESP version.

05

Car-like convenience

Smart entry with push-button start, automatic climate control, cruise control and an electronic parking brake.

06

Still a working pickup

Five seats and a 1,510 × 1,562 × 475 mm load bed on a 3,150 mm wheelbase, with a 3,220 kg gross vehicle weight.
